Keywords

Languages 📖 Italian (native speaker), English (advanced)

Coding 📖 PHP, Node, Python, Typescript, PostgreSQL, MySQL, Docker, Linux, Solr, ElasticSearch, Redis, Laravel, NestJS, Next, CI/CD, Git, AWS

Employment History

2024 – ···· 📖 **Lead Software Engineer - Innovatiespotter**, Groningen (Netherlands).

- Modernized legacy PHP systems by refactoring critical components, optimizing PostgreSQL queries, and migrating to Dockerized microservices to improve maintainability and performance
- Developed a scalable web scraper using NestJS and Puppeteer, integrating RabbitMQ for asynchronous workflows and resilient error handling
- Supervised a Python FastAPI data pipeline implementing a custom data-guessing algorithm for intelligent data enrichment
- Hired and built a high-performing team of Software Engineers, managing the full recruitment process
- Mentored junior developers and interns, accelerating on-boarding and fostering professional growth

2023 – 2024 📖 **Software Developer - Tannico**, Milan (Italy).

- Developed and maintained custom Magento modules for warehouse management, shipping logistics, and e-commerce authentication
- Created and optimized SQL queries and stored procedures for an internal dashboard
- Managed, cooperating with the CTO, an external team for developing a Symfony-based invoicing system integrated with the Magento database and AWS S3 storage, including the development of an invoice export module
- Coordinated external consultants on the Next project, delivering customized e-commerce solutions for corporate clients using Dato CMS and a centralized Magento database

Employment History (continued)

2021 – 2023

📌 **Software Developer - Freelancer**, Turin (Italy).

- Started as a part-time freelance developer while employed, later transitioning to a full-time role as client demand increased, while maintaining selective digital consulting projects
- Developed custom PHP solutions focused on management systems and dashboards for small to medium enterprises
- Provided technical web consultancy to startups, advising on scalable and efficient solutions
- Collaborated with various digital agencies to deliver tailored projects
- Managed multidisciplinary teams comprising copywriters, designers, and system administrators

2015 – 2023

📌 **IT Project Manager, Editorial Director - iMEDIA**, Turin (Italy).

- Created the digital presence for publishing house magazines by developing websites and digital editions
- Acted as Product Manager for a subscription-based mobile app, defining business requirements, managing external development teams, and overseeing project budget and deliverables
- Directed both print and digital editions of “Spit – il giornale dell’arrampicata,” overseeing editorial management, content creation, budget administration, and event organization

Education

2021

📌 **Postgraduate Master, Multimedia Design and Management for Communication** University of Turin.

- Interdisciplinary program blending design, communication strategy, and computer science
- Focused on advanced application development, database management, and programming (including OOP, PHP, and Python) to bridge creative and technical domains

2013

📌 **Bachelor Degree, Political Science**, University of Turin.

- Built strong analytical and research skills through courses in statistics, econometrics, and digital media sociology, with a focus on data analysis and networked systems

Miscellaneous Experience

2024

📌 **Invited Guest Lecturer, University of Groningen | Campus Fryslan**, Digital Science and Society course.
